#### MEMORANDUM FOR PRS (In-House Publication)

FROM: PROI (STINFO)

17 Mar 2003

SUBJECT: Authorization for Release of Technical Information, Control Number: AFRL-PR-ED-TM-2003-068
Karin Karg & David Powell (Triton Systems, Inc.), "Chopped Fiber Discontinuously Reinforced Aluminum"

For Oral Presentation to Prospective Commercial Partners (possibly Internat'al) (Statement A)

#### Triton Systems, Inc. Structural Materials Group Contact Information:

Dave Powell- Director, Structural Materials Polymer Matrix Composites: 978,250,4200 x 214

Continuous Reinforced Aluminum Composites:

Jim Burnett

978.250.4200 x 137

Discontinuous Reinforced Aluminum Composites:

Karin M. Karg

978.250.4200 x 201

**DISTRIBUTION STATEMENT A**Approved for Public Release
Distribution Unlimited

### Data available to date:

- Tensile testing of Triton's Chopped Fiber **Discontinuous Reinforced Aluminum**
- using Triton's Enhanced Pressure Infiltration Casting<sup>TM</sup> Process
- using Standard Foundry Process Parameters
- Triton estimates process refinement will enable an additional 10% improvement in properties

#### Testing in process:

- Fatigue
- Elevated Temperature Tensile Testing
- U L U

						Longitudinal, 50x

Test results using cast aluminum reinforced with discontinuous chopped fibers

High pressure casting process (EPIC<sup>TM</sup>) Isotropic

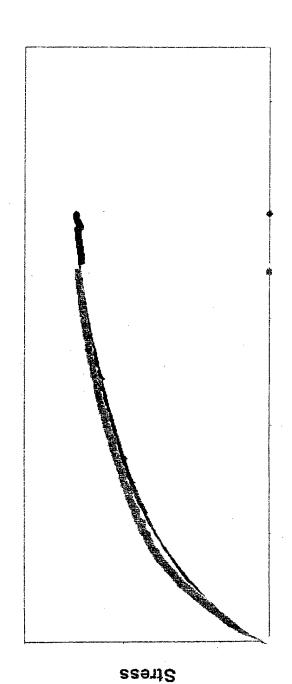

Thru, 50x

Process refinement will increase properties >10%

Triton is currently refining process:

⇒Transition to Standard Foundry Investment Casting process ⇒improve properties and conduct materials characterization

Strain

Early test results using A356 reinforced with chopped fibers Typical Foundry Process

Parameters
Cast 170mm x 100mm x 6.5 mm

**Isotropic**
